

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A digital television converter for a television apparatus, said television apparatus which is incapable of reception of digital television broadcasts, said converter comprising:
 - a SCART connector for mating with a corresponding connector on said television apparatus so as to make electrical contact therewith and be mechanically supported thereby;
 - a tuner for selecting and demodulating a digital television channel and for supplying to said connector signals in a form suitable for use by said television apparatus;
 - a connector rear housing which cooperates with said connector to form a compact enclosure containing and mechanically supporting said tuner wherein a height of said housing is approximately less than twice that of the SCART connector in order to provide a relatively compact converter;
 - a remote control signal input receiver mounted on said enclosure, wherein the tuner includes a controller to control said converter in response to remote control signals; and
 - a power supply input connector mounted on said enclosure for connection to a remote power supply.
2. (Canceled)

3. (Original) A converter as claimed in claim 1 in which said tuner has an input, said connector comprising an aerial input connector fixed to said housing and electrically connected to said input of said tuner.
4. (Original) A converter as claimed in claim 1, comprising a printed circuit board, said tuner being mounted on said printed circuit board which is electrically connected to said connector and which is mechanically connected to said connector so as to be supported thereby.
5. (Original) A converter as claimed in claim 4, in which said connector comprises a plurality of terminals with rear portions connected to said circuit board.
6. (Original) A converter as claimed in claim 5, in which said circuit board extends below said rear portions.
7. (Original) A converter as claimed in claim 5, in which said rear portions extend rearwardly and then downwardly so as to connect to said circuit board.
8. (Original) A converter as claimed in claim 4, in which said connector comprises a body to which said circuit board is mechanically fixed.
9. (Original) A converter as claimed in claim 1, comprising a further connector mounted on said enclosure for mating with a further mating cable-end connector.

10. (Original) A converter as claimed in claim 9, comprising a changeover switching arrangement for selectively connecting said connector to one of said tuner and said further connector.

11-14. (Canceled)
